

DEAR CANADA,

As a national network of Canadian health system operators and entrepreneurs, the threat of U.S. tariffs represents a pivotal moment for all of us. There is no question that this decision presents one of the greatest economic risks to our nation, impacting every sector and every Canadian. But this is also an opportunity for us to collectively do more and invest in homegrown solutions built by Canadians, for Canadians.

Nowhere is this truer than in health care. Our health care system is a pillar of our national identity, and often how we differentiate ourselves as Canadians.

As members of the CAN Health Network, we are proud to be part of the first-ever collaboration of health care operators and companies from coast-to-coast-to-coast working towards a common goal: accelerating the adoption of Canadian technology that improves patient care, supports Canadian entrepreneurs and drives economic growth.

This is our call to action: let's expedite the commercialization and adoption of Canadian technology. Let's ensure our loved ones receive life-saving care with technology made here at home. Let's ensure the entrepreneur who has risked it all can keep their company, employees and revenue here in Canada.

Let's rise to this moment, Canada. Let's build the future of Canadian health care and entrepreneurs, together.

Sincerely,

Canada's health operators and entrepreneurs, united.
